

Pahami langkah-langkah ini untuk melakukan parafrase secara manual :

- **Put the text in your own words**, letakkan teks dalam kata-kata anda sendiri.
- **Avoid copying the text**, cegah menyalin teks
- **Rearrange similar text**, tata-ulang teks yang serupa.
- **Aks your self if you included all the important points**, tanya kepada diri-sendiri apakah akan menyertakan seluruh poin penting.

Namun sekarang sudah banyak alat-bantu (tool) di internet yang akan membantu kita melakukan parafrase dengan segera, berikut ini saya tunjukkan salah satu hasilnya :

The screenshot displays a web application for text paraphrasing. The top navigation bar includes various modes: Word Changer, Fluency, Standard, Formal, Smooth, Creative, Smarter, Shorten, Academic, and Expand. The 'Word Changer' mode is selected. The main interface is divided into three sections. On the left, the 'Input Text' section contains a paragraph about the egg production of different chicken breeds (KUB, Kuntara, Elba). In the center, a 'Pro Membership' banner promotes a \$9/week subscription, highlighting features such as an increased paraphrasing limit, no ads/recaptcha, and premium modes. On the right, the 'Output Text' section shows the paraphrased version of the input text. At the bottom, there are buttons for 'Check Plag', 'Summarize', and 'Check Grammar'. The word count shows 34/400 words input and 37 words output. A notification at the bottom indicates a 'Break Word Limit in \$9.00 only!'.

Dengan bantuan tool tersebut, kita cukup masukkan naskahnya, dan kemudian biarkan tool tersebut bekerja untuk kita. Tertarik mencobanya?
